CHESS PLUS summer camp features engaging chess activities in our morning sessions and fun non-chess activities in the afternoon sessions. This combination is very effective and keeps your child fully engaged and excited during the course of the camp.

We know kids love building and creating, the afternoon session will be our intro to engineering program where campers will be broken up into groups of 2 to 4 and have a blast with robotic creations, circuit building, legos and much more. Aside from the Science, Technology, Engineering, and Math (STEM) concepts being learned, our camper will also build on their team-building skills as they work to complete fun challenges. These collaborative skills are essential for all children’s success, no matter what fields they choose to pursue in the future.
