We are a Advance Electronic Repair Center, Focusing on people first we make technology work better for you . We ve been in business for 5 years now and have 18+ years experience in the technology Industry. PROTECHS is an Advance electronic service center, We currently Service and Repair PC/Laptops, smart phones, Tablets and provide security surveillance and networking installation services. Our customer base is mixture of end-user consumers and small businesses in the tri-state area. We focus on and look forward to building long term relationships with every customer Our continued goal from the beginning is to genuinely help folks first get over their fear with computers by resolving their computer issues and showing them how to fix it if it occurs again. As such, our certified technicians first started training companies and residences with different software and technologies. We then focused our skill sets more on computer repairs and support as new Windows and Mac operating systems were upgraded. The two qualities of focusing on people first with training and guidance as well as expert computer repairs have continued to allow our technicians provide the qualified support that thousands of New Cincinnatins love and look forward to. Over the years, we have gained industry expertise in data recovery, laptop and desktop hardware repairs (i.e. motherboard / video / LCD screen / jack replacements), server/network support and have been fortunate enough to attain our customers mostly from the best testament of all: word of mouth.
